

# TOP 5 UPDATES FOR POWER APPS

## ENHANCED PLATFORM CAPABILITIES

Among these new capabilities are reusable components, formula editor, offline data access and integration with Azure AD Groups.

## MOBILE IMPROVEMENTS

It is now easier to sign in to Dynamics 365 on a mobile device. It is also easier to build canvas apps with a responsive layout- which results in a better app experience.

## UNIFIED INTERFACE FOR EVERYONE

The UI is the mainline experience for CDS for Apps. The user's home page experience is improved to show all model driven apps.

## VISUAL FORM AND VIEW DESIGNERS

With the new visual forms and view designers, makers can easily create and customize views with a WYSIWYG experience.

## POWER APPS CONTROL FRAMEWORK

PCF is the fundamental building block for all new controls- whether you are building a model-driven or a canvas app.
